Compliance Disclosure Statement Pursuant to EU Data Act

Consumer Notice：

This document is prepared in accordance with the requirements of Article 3 of the EU Data Act (Data Act), for the purpose of fully disclosing to you the data processing information related to the purchased Connected Products of Lumi United Technology Co., Ltd. (hereinafter referred to as “Lumi Company”, “we”, “us” or “our”) and our relevant services.

This document only applies to your use of **[Camera G510 (Battery)]** provided by us.

According to Data Act, the following Lumi **[Camera G510 (Battery)]** may be classified as connected products.

Numbers	Products
1	**Camera G510 (Battery)**

The data collected by Lumi **Camera G510** may vary depending on the versions and models.

I. Connected Product Information Disclosure

1. Data Generation Details

Data Type	Purposes of Data Processing	Format	Estimated Volume	Generation Frequency and Continuity	Storage Method	Product Involved
Device Operation and Configuration Data	Used for device configuration, operational control, status display, and reporting command execution results.	JSON	50–100 KB per day	Generated during device operation, when the user changes settings or performs a control operation, or when the device status changes.	The data are stored locally on the G510 and/or in the cloud.	**Camera G510 (Battery)**
Basic Device and Connection Data	Used for device identification, network connectivity, status synchronization, and device management.	JSON or binary format	Less than 15 KB per day	Generated when the device starts, connects to a network, its connection status changes, or it sends heartbeat information.	Depending on the user's settings, the data are stored locally on the G510 and/or in the cloud.	**Camera G510 (Battery)**
Video Recordings, Images, and	Used for security recording, event recording,	TS, JPG, and	Video: 0–28 GB per day; images: 0–5	Generated continuously or when triggered by	Stored locally on a MicroSD card by default.	**Camera G510 (Battery)**

Data Type	Purposes of Data Processing	Format	Estimated Volume	Generation Frequency and Continuity	Storage Method	Product Involved
Related Metadata	playback, viewing, and downloading.	JSON	GB per day, depending on user settings and triggered events.	a security event or user operation, depending on the user's settings.	If cloud storage is enabled, relevant data may also be stored in the cloud.	
User-Configured Recording Data	Used to record video in user-selected scenarios.	JSON	0–200 KB per day	Generated when a relevant event occurs.	Depending on the user's settings, the data are stored locally on the G510 and/or in the cloud.	**Camera G510 (Battery)**
Security Event and Alarm Data	Used for security detection, alarm notifications, event queries, and triggering recordings.	JSON	0–400 KB per day	Generated when a relevant event occurs.	Depending on the user's settings, the data are stored locally on the G510 and/or in the cloud.	**Camera G510 (Battery)**

2. Data Storage Information

Local storage: Video recordings and images are stored on a MicroSD card or other supported local storage media and are retained until deleted by the user or overwritten according to the applicable loop-recording settings. Cloud storage: If the user enables cloud storage, the relevant recordings, images, and metadata are retained according to the cloud storage plan selected by the user. Other product data stored in the cloud are retained for up to 7 days, unless otherwise specified in the applicable service terms. Lumi operates data centers in China, the United States, Singapore, Russia, and Germany. For users in the European Union, cloud-stored product data are stored on servers located in Germany.

3. User Access and Control Rights

You have rights and choices when it comes to the product data. You may be afforded certain rights under applicable laws, which may include the right to access, retrieve or erase the data.

You may submit a request to exercise your rights under applicable laws at privacy@lumiunited.com. You may appeal any decision we have made about your request by following the instructions in the communication you receive from us notifying you of our decision. We will resolve your request within seven days after receiving your email.

II. Related Services Information Disclosure

1. The details of the product data that we are expected to obtain

Data Type	Purposes of Data Processing	Format	Estimated Volume	Collection Frequency	Storage Method	Product Involved
Device Operation and Configuration Data	Used for device configuration, operational control, status display, and reporting command execution results.	JSON	50–100 KB per day	Collected during device operation, configuration, control operations, or status changes when transmitted to the related service.	Stored in the cloud when transmitted to the related service; otherwise retained locally on the G510, where applicable.	**Camera G510 (Battery)/Aqara Home App**
Basic Device and Connection Data	Used for device identification, network connectivity, status synchronization, and device management.	JSON or binary format	Less than 15 KB per day	Collected at device startup, network connection, connection-status changes, or heartbeat transmission.	Stored in the cloud when transmitted to the related service; otherwise retained locally on the G510, where applicable.	**Camera G510 (Battery)/Aqara Home App**
Video Recordings, Images, and Related Metadata	Used for cloud storage, remote viewing, playback, downloading, event notifications, and related security services.	TS, JPG, and JSON	Video: 0–28 GB per day; images: 0–5 GB per day, depending on user settings and triggered events.	Collected continuously or when an event occurs, but only when cloud storage or another upload-enabled feature is enabled.	Stored in the cloud only when cloud storage or another upload-enabled feature is enabled; otherwise retained locally.	**Camera G510 (Battery)/Aqara Home App**
User-Configured Recording Data	Used to record video in user-selected scenarios.	JSON	0–200 KB per day	Collected when recording scenarios are created or changed through the app, or when configuration synchronization or backup is enabled.	Stored in the cloud when synchronization or backup is enabled; otherwise retained locally, where applicable.	**Camera G510 (Battery)/Aqara Home App**
Security Event and Alarm	Used for security detection, alarm notifications,	JSON	0–400 KB per day	Collected when a security event occurs and event	Stored in the cloud when the	**Camera G510 (Battery)/Aq**

- **Access Method:** You have rights and choices when it comes to the Related Service data. You may be afforded certain rights under applicable laws, which may include the right to access, retrieve or erase the data. You may submit a request to exercise your rights under applicable laws at privacy@lumiunited.com. You may appeal any decision we have made about your request by following the instructions in the communication you receive from us notifying you of our decision. We will resolve your request within seven days after receiving your email.
- **Cloud storage:** Product data transmitted to the related service are stored on servers located in Germany for users in the European Union. Video recordings, images, and related metadata are uploaded only when the user enables cloud storage or another upload-enabled feature and are retained according to the selected cloud storage plan. Other cloud-stored product data are retained for up to 7 days, unless otherwise specified in the applicable service terms. **Local storage:** Product data that are not uploaded remain stored locally and are subject to the applicable local deletion or overwrite settings.

2. The details of the Related Service data to be generated

Nature of Data	Purposes of Data Processing	Estimated Volume	Collection Frequency	Storage Method	Related Service Involved
Device Operation and Status Data	Used to support device connectivity and control, status synchronization, and security and performance assurance.	Each device generates approximately 50–200 KB of data per day; total daily data per user are typically less than 1 MB.	Collected in real time or when the user uses the app.	Stored locally and uploaded to the cloud only when the user uses remote connectivity, control, status synchronization, or another cloud-enabled feature.	Aqara Home App
Customer Usage Data	Used for account and service delivery, synchronization and restoration of user	An active user generates approximately 30–80 KB per	Collected in real time or when relevant events occur.	Stored locally and/or in the cloud as required for account	Aqara Home App

	customizations (such as scenes and device names), and product improvement.	day, equivalent to 10–30 MB per year.		services, synchronization, backup, or service delivery. Cloud transmission occurs only when the corresponding online feature is used.	
System Diagnostic and Log Data	Used for troubleshooting and reliability, including error triage, crash analysis, and analysis of performance issues.	An average of less than 5 KB per day, or 1–3 MB per device per year.	Collected only when an error occurs or the user submits feedback.	Stored locally by default and uploaded to the cloud only when error reporting, remote diagnostics, or user feedback submission is triggered.	Aqara Home App

- **Access Method:** You have rights and choices when it comes to the product data. You may be afforded certain rights under applicable laws, which may include the right to access, retrieve or erase the data. You may submit a request to exercise your rights under applicable laws at privacy@lumiunited.com. You may appeal any decision we have made about your request by following the instructions in the communication you receive from us notifying you of our decision. We will resolve your request within seven days after receiving your email.
- **Data Storage Information:** Lumi operates data centers in China, the United States, Singapore, Russia, and Germany. For users in the European Union, cloud-stored related service data are stored on servers located in Germany. Cloud-stored data are retained for up to 7 days, unless a different retention period is specified in the applicable service terms. **Local device data:** Data stored locally on the G510 or its storage media are retained until the user deletes them, resets the device to factory settings, or the data are overwritten under the applicable loop-recording settings. To erase data stored on the device, follow the factory-reset instructions in the product manual. **Cloud account data:** To request deletion of account data stored in the cloud, use the account-deletion function available in the Aqara Home App or contact privacy@lumiunited.com. The exact menu path may vary by app version. Resetting the device and deleting the cloud account are separate operations: resetting the device does not by itself delete cloud account data, and deleting the cloud account does not necessarily erase data remaining on local storage media.

3. Third-Party Sharing

In general, Lumi will not share these data with third parties. Lumi will ask for the consent of users in the cases that it needs to invite third parties to provide services for users.

4. Identity of Data Holder and Processors

- Data Holder: Lumi United Technology Co., Ltd.
  - Geographical Address: Room 801-804, Building 1, Chongwen Park, Nanshan iPark, No. 3370, Liuxian Avenue, Fuguang Community, Taoyuan Residential District, Nanshan, Shenzhen, China.
  - Contact: privacy@lumiunited.com
- There are no other data processors.

5. The indication of how the user can request that the data be disclosed to a third party and how to stop the data transfer

- Sharing Request Method:

a. [You may submit a request to exercise your rights under applicable laws at privacy@lumiunited.com]

- Sharing Termination Method:

a. [You may submit a request to exercise your rights under applicable laws at privacy@lumiunited.com]

6. Right of appeal

You may exert your appeal right by contacting us at privacy@lumiunited.com, and we will respond to your request within timeframe set out under your applicable data protection laws.

7. Complaint Right

You have the right to lodge a complaint with the competent authority designated pursuant to Article 37 of the Data Act for any violations related to this document:

You may find the contact details of your local supervisory authority in EU member states on the website of the European Data Protection Board: https://edpb.europa.eu/about-edpb/board/members_en

8. Trade Secrets Statement

[Lumi United Technology Co., Ltd.] is the trade secret holder.

9. Contract Duration and Termination

- Service Duration: In general, the contract for providing related services will be valid until consumers terminate it or withdraw their consent for data processing.
- Termination Scenarios:

a. You withdraw your consent;

b. After we confirm your deletion or cancellation;

c. We terminate the operation of the corresponding products and services.
