Compliance Disclosure Statement Pursuant to the EU Data Act

Consumer Notice:

This document is prepared in accordance with Article 3 of the EU Data Act to disclose information concerning data generated by the connected products identified below and data generated in the provision of related services by Lumi United Technology Co., Ltd. ("Lumi Company", "we", "us" or "our").

This document applies to the **Light Strip** provided by us.

The following Lumi Company products are connected products within the scope of this disclosure.

Numbers	Products
1	Outdoor Permanent Lights 50ft
2	Outdoor Permanent Lights 100ft
3	Outdoor Permanent Lights 150ft
4	LED Strip T2 10 ft
5	LED Strip T2 16 ft
6	LED Strip T2 32 ft
7	Outdoor String Lights 50ft
8	Outdoor String Lights 100ft
9	Floor Lamp

All listed models have the same relevant functions and data behaviour. Data volumes may vary with firmware, configuration and actual use. Scene and effect settings are supplied by related services and stored on the product; the product reports stored settings, status and execution results.

I. Connected Product Information Disclosure

1. Data Generation Details

Data Type	Purposes of Data Processing	Format	Estimated Volume	Data Generation Frequency and Continuity	Storage Method	Product Involved
Connectivity and Diagnostic Data	Used for network connection, connection maintenance and diagnostics.	JSON	Approximately 10-50 KB per day.	Generated after the product joins the network and continuously or periodically while connected.	Not stored locally; reported to the gateway.	All listed products
Lighting Status and Parameter Data	Used to store and report the applied lighting state and parameters, including scene/effect execution feedback.	JSON	Approximately 5-50 KB per day, including scene/effect feedback.	Settings are recorded when received via the gateway. Status and execution results are reported after control operations and resynchronized on initial network joining or recovery from an unexpected power loss or restart.	Stored locally until updated or erased by factory reset.	All listed products
Device Configuration and User Settings Data	Used to store and apply device settings selected through the user interface.	Binary	Up to approximately 1 KB in total.	Settings are recorded when received via the gateway following a user change; synchronized on initial network joining or recovery from an unexpected power loss or restart.	Stored locally until updated or erased by factory reset.	All listed products

2. User Access and Control Rights

You have rights in relation to product data, including the right to access, retrieve or erase such data where provided by applicable law.

You may submit a request to exercise your applicable rights at privacy@lumiunited.com. You may appeal a decision concerning your request by following the instructions provided with that decision. We will respond within seven days after receiving your email.

II. Related Services Information Disclosure

1. Product Data Expected to Be Obtained by Related Services

Nature of Data	Purposes of Data Processing	Estimated Volume	Collection Frequency	Storage Method	Related Service Obtaining the Data
Connectivity and Diagnostic Data	Used for network connection, connection maintenance and device diagnostics.	Approximately 10-50 KB per day.	Collected via the gateway after network joining and when connection or diagnostic data are reported.	Stored by the applicable related service; cloud-stored data are subject to the retention arrangements stated below.	Aqara cloud services; displayed in Aqara Home App
Lighting Status and Parameter Data	Used to display product status and lighting parameters and to provide remote lighting functions.	Approximately 5-50 KB per day, including scene/effect feedback data in the following row.	Collected via the gateway when the product reports its applied state or parameters, including resynchronization after initial network joining or an unexpected power loss or restart.	Stored by the applicable related service; cloud-stored data are subject to the retention arrangements stated below.	Aqara cloud services; displayed in Aqara Home App
Lighting Scene and Effect Synchronization and Feedback Data	Used to synchronize stored scene/effect settings and display the applied state and execution results.	Included in the approximately 5-50 KB per day estimate above; not additional data volume.	Collected via the gateway following scene/effect execution or synchronization on initial network joining or recovery from an unexpected power loss or restart.	Stored by the applicable related service when reported; cloud-stored data are subject to the retention arrangements stated below.	Aqara cloud services; displayed in Aqara Home App
Device Configuration and User Settings Data	Used to synchronize, restore and apply device settings and user-selected configurations.	Up to approximately 1 KB in total.	Collected via the gateway when settings are updated or resynchronized after initial network joining or an unexpected power loss or restart.	Stored by the applicable related service; cloud-stored data are subject to the retention arrangements stated below.	Aqara cloud services; displayed in Aqara Home App

- **Access Method: The product reports data to the gateway, which forwards them to Aqara cloud services for display in Aqara Home App. You may access available product data through the applicable App functions. Where direct access is not available, contact privacy@lumiunited.com. We will respond within seven days after receiving your email.**

2. Related Service Data Generated in the Provision of Related Services

Nature of Data	Purposes of Data Processing	Estimated Volume	Collection Frequency	Storage Method	Related Service Involved
Device Operation and Status Data	Used for device connectivity and control, status synchronization, and security and performance assurance.	Approximately 50-200 KB per device per day; normally less than 1 MB per user per day.	Generated in real time or when the user operates the product through the App.	Stored by Aqara Home; cloud-stored data are subject to the retention arrangements stated below.	Aqara Home App
Account, Configuration and User Preference Data	Used for account and service delivery and for synchronizing or restoring device names, scenes and other user settings.	Approximately 30-80 KB per active user per day, equivalent to approximately 10-30 MB per year.	Generated in real time or when the user changes a configuration or preference.	Stored by Aqara Home; cloud-stored data are subject to the retention arrangements stated below.	Aqara Home App
System Diagnostic and Log Data	Used for troubleshooting, error analysis, crash analysis and performance monitoring.	Normally less than 5 KB per device per day, or approximately 1-3 MB per year.	Generated when an error occurs or when the user submits diagnostic information or feedback.	Stored by Aqara Home; cloud-stored data are subject to the retention arrangements stated below.	Aqara Home App
Lighting Scene and Effect Configuration and Command Data	Used to configure, select, synchronize and send static or dynamic lighting scenes and effects from the App to the product.	Up to approximately 4.93 KB in total for the scene/effect payload; reusable.	Generated or updated when a user creates, changes or selects a scene or lighting effect in the App; sent when the function is used.	Stored by the related service and sent via the gateway. The product stores the received settings until remotely deleted, individually by ID or in batches, or erased by factory reset. Related-service retention is described below.	Aqara Home App and/or applicable Aqara cloud services

- **Access Method: You may access related service data available through the applicable functions of Aqara Home. Where direct access is not available, you may submit a request at privacy@lumiunited.com. We will respond within seven days after receiving your email.**

Data Storage and Deletion Information

Where Lumi Company stores product data or related service data in the cloud for users in the European Union, such data are stored on servers located in Germany. Cloud logs are retained for up to 7 days. Account information, user preferences, scene configurations and similar data are retained while the user uses the relevant service. They are deleted in accordance with the applicable deletion process when the user deletes the relevant data or closes the account, except where retention is required by law. Other applicable storage arrangements are described in the relevant tables. Data stored locally on the product may be deleted by restoring the product to its factory settings. Stored scene and effect data may also be deleted remotely, individually by ID or in batches. Please refer to the user manual applicable to the relevant product model for detailed instructions. Please note that a factory reset is irreversible. To delete data stored in the cloud or by a related service, please use the deletion function provided by Aqara Home App or another applicable related service, where available. If no such function is available or you are unable to delete the data directly, please contact Lumi Company at privacy@lumiunited.com. Certain data may be retained where required by applicable law or where necessary for the establishment, exercise or defence of legal claims.

3. Third-Party Sharing

In general, Lumi Company will not share these data with third parties. Lumi Company will ask for the consent of users in the cases that it needs to invite third parties to provide services for users.

4. Identity of Data Holder and Processors

- Data Holder: Lumi United Technology Co., Ltd.
  - Geographical Address: Room 801-804, Building 1, Chongwen Park, Nanshan iPark, No. 3370, Liuxian Avenue, Fuguang Community, Taoyuan Residential District, Nanshan, Shenzhen, China.

- Contact: privacy@lumiunited.com

- As of the date of this disclosure, no other parties process the data described in this disclosure on Lumi Company's behalf. If this changes, we will update this disclosure as required by applicable law.

5. How to Request and Stop Third-Party Data Sharing

- Sharing Request Method:

a. You may request that available data be provided to a designated third party by contacting privacy@lumiunited.com and identifying the data, recipient and requested sharing arrangement.

- Sharing Termination Method:

a. You may request that ongoing data sharing be stopped by contacting privacy@lumiunited.com. Where available, you may also use the relevant controls in Aqara Home App or the enabled integration.

6. Requests and Concerns

If you have questions or concerns about this disclosure, please contact us at privacy@lumiunited.com. We will respond within the timeframe required by applicable law.

7. Complaint Right

You have the right to lodge a complaint alleging an infringement of Chapter II of the Data Act with the competent authority designated under Article 37 of the Data Act in the relevant EU Member State.

Contact details for the competent authority or data coordinator may be obtained from the official website of the relevant EU Member State or from information published by the European Commission, where available.

8. Trade Secrets Statement

The data covered by this disclosure include trade secrets held by Lumi United Technology Co., Ltd. Where data sharing involves those trade secrets, we will identify the protected data and

agree proportionate confidentiality measures with the user in accordance with Article 4(6) of the EU Data Act. Such measures will not restrict the user's access rights except as permitted by applicable law.

9. Contract Duration and Termination

- Service Duration: A related-service contract remains in effect until it expires or is terminated in accordance with the applicable service terms. Withdrawal of consent for data processing does not automatically terminate the contract; its effect on the service depends on the processing concerned and the applicable service terms.
- Termination Scenarios:

a. The related-service contract expires or is terminated in accordance with the applicable service terms;

b. Your account is deleted or the related service is terminated at your request, in accordance with the applicable service terms;

c. We discontinue the corresponding related service in accordance with the applicable service terms and law.
